

WELD THE WORLD

# Cruiser 322T 402T 502T

# Cruiser 322T

TIG AC/DC HF - MMA

# Cruiser 322T

## Technical Data

**The Cruiser 322T** is a highly sophisticated but simple to operate, Three Phases Inverter TIG DC welding machine. In TIG DC mode the Cruiser 322T inverter generator is ideal for welding ordinary steels, stainless steel and copper. **The Cruiser 322T** has been designed particularly for extremely precise constructions, in petrochemical plants, food industry and other activities which require very high welding performance.

- 50 programs can be loaded and saved in memory
- Remote controls are available: for torch (UP&DOWN, potentiometer), foot pedal or remote control unit
- Cooler unit is also available

## Special Functions

The pulse TIG with frequency up to 2500Hz allows the operator to weld very thin materials with easy arc control and very low heat input on workpiece.

Pre-set balanced parameters, stored in the Synergic Pulse TIG DC SYN curve, help to simplify Pulsed welding process. The Pulse is altered automatically when the welding current is adjusted.

The **Q-START** (Quick start) function facilitates the joining of the parts in the initial stage of the welding process. On activating this function the machine automatically switches to Synergic pulsed mode for a preset time.

The **DYNAMIC ARC** function makes it possible to keep the pre-set Voltage x Current constant. The power source increases the welding current as the arc voltage decreases and reduces the welding current if the arc voltage increases.

Dynamic Arc TIG welding

Standard TIG welding

The **Q-SPOT** (Quick Spot) function makes it possible to minimise tacking times for light gauge sheet metal.

Pipe butt weld  
Ø 31.75 x 2 mm

Corner spot welding  
thickness 0,6 mm

The **MULTITACK** system makes it possible to reduce heat output while joining two light gauge parts.

Plus and Accessories

## PLUS

### STRUCTURAL STRENGTH

The structural strength of the Cruiser 322T - 402T - 502T is very robust in any working environment.

### ROBUST WHEELS

The robust wheels of the Cruiser 322T - 402T - 502T allows smooth movement of the power source.

### EASY CARRIAGE

The Cruiser 322T - 402T - 502T can be easily moved around any workplace thanks to our robust trolley.

**A solid industrial activity, where the production is based on substantial investments for the supporting of research, projection and continuous testing.**

Since 1997 Weco has been producing and selling welding machines

Both registered office and production plant are based on the north east of Italy. Our offices, technical/project department, production and warehouse are able to serve both our national and international sales net. A wide range of welding machines together with a huge stock, allow us to encounter and fully satisfy our customers' requests in short time.

A dynamic management supported by solid experience on the main sales' arguments and a deep knowledge on the application issues, allow this company to be ahead in the welding sector.

WECO means better solution for improving the production, optimizing the intervention time, minimizing the processes' costs, with the highest perform-standards granted.
